EXPERIENCE

Together AI

Staff Software Engineer

02/2025 - Present | San Francisco, CA

- Build the data platform behind Together's AI acceleration cloud: the pipelines, storage, and telemetry that turn inference and training traffic into product, reliability, and capacity signals.
- Build internal agent tooling and evaluation harnesses that let engineering teams develop, test, and ship LLM-powered agents on Together's inference stack.
- Design data infrastructure for large-scale training and inference workloads, covering dataset curation, lineage, and quality controls for open-model work.

Prove Identity

Staff Software Engineer - Data

06/2023 - 01/2025 | Remote, USA

- Spearheaded a company-wide refactor from on-prem Java + Oracle to cloud-based Go + Postgres, reducing core product API response time to 12ms and operational expenses by 95%.
- Built AI-driven Retrieval-Augmented Generation (RAG) chatbots with Airflow, LangChain, and OpenAI, automating 150+ human-hours weekly.

Meta | Facebook

Senior Data Engineer

01/2021 - 09/2022 | Menlo Park, CA | Seattle, WA | Remote, USA

- Led data engineering efforts for Facebook Public Groups and Community Chats, managing a team of 10+ engineers.
- Developed and deployed 100+ ML pipelines with Airflow, Spark, and PyTorch, leveraging NLP and computer vision to optimize ad targeting and notifications for billions of users.
- Designed an automated framework to dynamically generate thousands of async Spark data pipelines, increasing compute efficiency by 66%.

Deloitte

Consultant - AI & Advanced Analytics

12/2018 - 12/2020 | Menlo Park, CA | Seattle, WA

- Automated ~31% of human processed healthcare claims using transformer ML models, saving 250,000+ hours annually.
- Cut daily processing time for exabyte-scale video reliability metrics by 90% while expanding metric coverage.
- Led 20+ consultants on Fortune 50 engagements, translating client needs into actionable requirements and ensuring timely delivery.

Wide Open West

Senior Data Engineer

11/2017 - 12/2018 | Denver, CO

- Built ML applications using custom classification and churn models, driving a 22% YoY increase in customer package upgrades.
- Led a team of 5 data practitioners, providing BI and data insights to sales, product, and engineering teams company-wide.

Common Spirit Health

Data Engineer

09/2016 - 11/2017 | Denver, CO

- Architected and delivered new rest APIs and data lakes, improving data processing time for external partner data products from 7 days to 5 minutes.

AcuStream (acquired by R1)

Software Engineer - Data

04/2013 - 09/2016 | Boulder, CO

- Built a custom invoicing system leveraging rule-based algorithms and machine learning, driving over \$300M in annual recurring revenue.

SKILLS

Programming

Python, SQL, JavaScript, TypeScript, Go, Rust, Scala

AI & ML

OpenAI, Anthropic, LangChain, Llama.cpp, Ollama, Llama Index, PyTorch, TensorFlow, Hugging Face, Vector Databases, Embeddings, Agents, Evals, RAG, Cuda, Scikit-Learn

Big Data

Airflow, Kafka, Spark, Flink, DBT, Snowflake, Databricks, Iceberg, Redis, ProtoBuff, Neo4J, MongoDB, Postgres, PySpark, Streamlit

Web Development

Docker, Kubernetes, FastAPI, Flask, Django, Svelte, React, Node.js, HTML, GraphQL, Gin, NoSQL, Json

Amazon Web Services (AWS)

EMR, EKS, SageMaker, S3, Redshift, Glue, MWAA, RDS, Kinesis, Firehose, DynamoDB, Bedrock

Google Cloud Platform (GCP)

BigQuery, Compute Engine, Dataflow, AutoML, Vertex AI Studio, PubSub, Cloud Run, Looker, Firebase

PROJECTS

AI Teaching Assistant - Super Teacher

Full stack AI powered web application to help teachers manage their students and provide recommendations and insights.
github.com/jckail/superteacher
the-super-teacher.com

AI Integrated Professional Portfolio

Custom full stack react web application with integrated AI showcasing my experience, projects and skills.
github.com/jckail/portfolio
jckail.com

Loyalty Management App - PointUp.io

AI web app for managing "All of your hotel, credit card, and airline loyalty points in one place".
github.com/jckail/point_bot
pointup.io

TechCrunch - Join Group via QR Code

Created the ability for Facebook group admins to invite users to their groups by generating a QR Code. Used by millions daily.
<https://ttny.app/lybucwkc>

AI Agent Job Matching - Jobbr

Created a custom AI agent that matches a resume to available jobs at tech companies.
github.com/jckail/Jobbr
